

AI Faculty Mastery Program

Empowering Pharmaceutical & Life Science Educators for the AI Era

3-Weekend Hands-on Faculty Development Program

Teach Smarter. Research Faster. Create Better. Inspire the Next Generation. Build practical AI skills for the classroom and the lab in just 6 hours across three weekends — hands-on from the very first session.

DSet Academy × School of Life Science

Skill Development Training & Research · Domain Partner: Imperical Consulting (Pvt.) Ltd.

6 hrs

total training

3

weekends · 2 h each

10+

AI tools, hands-on

₹3,542

incl. 18% GST

What you will master

AI-powered teaching

Lecture plans, presentations, quizzes & classroom activities

Research & innovation

Literature review, research gaps, hypotheses — Perplexity & NotebookLM

Academic productivity

Reports, writing, meeting summaries, grant support

Data analytics for faculty

Excel + AI · HTML dashboards for research & student data

AI-ready curriculum design

Integrating AI into your Pharma / Life Science courses

Faculty capstone

Build your own AI teaching or research assistant

Format

2 hours every weekend → 3 weekends → 6 hours total, live via video conference, with two-way voice and video.

Designed for

Faculty teaching Pharmacy, Pharmaceutical Sciences & Life Science courses, who want to bring AI into their classroom and their research.

About the Program

The AI Faculty Mastery Program equips faculty members with practical AI skills to teach better, research faster, develop innovative academic content, and prepare students for an AI-enabled Pharmaceutical & Life Sciences industry.

Delivered live over video conference across three weekends, the program is hands-on throughout: you build a lesson plan, a research proposal, and — in the final capstone — your own AI-powered teaching or research assistant.

Why this program

Built for Pharma & Life Science educators

Every topic, tool and case study is chosen for a pharmaceutical/life science classroom and lab, not a generic audience.

Workshop, not lecture

Hands-on from the first weekend — you leave every session with a usable teaching or research output.

Teaching to research, in one program

From lesson plans to a research proposal to your own AI teaching assistant, in just three weekends.

True two-way communication

Voice and video interaction both ways on our platform — not a one-way broadcast with a chat box.

Real capstone challenge

Finish by building and presenting your own AI-powered academic solution.

Certificate of completion

A certificate recognising your hands-on AI capability as an educator.

Faculty Takeaways

Teach with AI	Research with AI	Create with AI	Analyse with AI	Mentor with AI	Build AI-Enabled Academic Solutions
---------------	------------------	----------------	-----------------	----------------	-------------------------------------

By the end of three weekends, faculty progress through each stage above — from teaching with AI to building their own AI-enabled academic solution.

Program at a Glance

Weekend	Theme	Duration
Weekend 1	AI for Teaching & Academic Excellence	2 Hours
Weekend 2	AI for Research & Innovation	2 Hours
Weekend 3	AI Productivity, Data & Future Education	2 Hours
Total	6-Hour Faculty Development Program	3 Weekends

Your 3-Weekend Roadmap

Weekend	Theme	Format
Weekend 1	AI for Teaching, Learning & Academic Excellence	2 Hours · Live Video Conference
Weekend 2	AI for Pharmaceutical Research & Innovation	2 Hours · Live Video Conference
Weekend 3	AI for Faculty Productivity, Data & Future Education	2 Hours · Live Video Conference

Each weekend is a single 2-hour live session. Timings, sequence and batch dates are indicative and are confirmed for each batch. A short faculty assignment follows Weekends 1 and 2.

Curriculum Map

Ten learning clusters take you from safe, prompt-savvy AI use to a capstone academic solution you build and present.

Cluster	Tools & topics	When
1 • Safety & responsible AI in academia	AI Security and data-privacy basics for handling research and student data safely	Weekend 1
2 • AI & prompt fundamentals for educators	ChatGPT · Claude · Gemini · Perplexity · prompt engineering for teaching	Weekend 1
3 • AI-powered teaching & content creation	Lecture plans, presentations, quizzes, case studies & classroom activities — Gamma, NotebookLM	Weekend 1
4 • Research intelligence	Literature search, paper analysis, research-gap identification, citations — Perplexity, NotebookLM	Weekend 2
5 • AI across pharma & life science research	Drug discovery, clinical research, pharmacovigilance, biotechnology, healthcare analytics, market intelligence	Weekend 2
6 • Applied research workflow	Hands-on: Research Topic → Literature → AI Analysis → Research Gap → Hypothesis → Research Framework	Weekend 2
7 • Academic productivity & communication	Reports, academic writing, emails, meeting summaries, SOPs, grant support — ChatGPT, Claude, TLDV	Weekend 3
8 • Data analytics for faculty	Excel + AI · HTML dashboards via Claude, Perplexity, Kimi · student-performance analysis	Weekend 3
9 • AI-ready curriculum design	Integrating AI into your courses, industry-aligned assignments — NotebookLM, Gemini Create	Weekend 3
10 • Faculty capstone challenge	Build your own AI teaching assistant, tutor or research assistant — Claude Skills & Connectors	Weekend 3

Session-by-Session Learning Plan

Every block below lists the exact time allotted, the tools you will use, and the output you walk away with.

WEEKEND 1 • AI for Teaching, Learning & Academic Excellence

2 hours • Live Video Conference • Hands-on from minute one

Time	Min	Module	Tools & platforms	Hands-on outcome
0:00-0:30	30	AI & Generative AI for Faculty	ChatGPT • Claude • Gemini • Perplexity	AI, Generative AI, AI Agents & AI Copilots explained; prompt engineering for educators; responsible use of AI in academia
0:30-1:15	45	AI-Powered Teaching	ChatGPT / Claude (lecture plans & content) • Gamma (presentations) • Gemini NotebookLM (student-friendly explainers) • live debate board (classroom activities)	Lecture plans, teaching material & presentations, case studies and classroom activities, quizzes/assignments/question banks, and personalised learning support
1:15-2:00	45	Hands-on Faculty Workshop	ChatGPT / Claude • Gamma • Gemini NotebookLM	Create a complete AI-assisted lesson plan, a presentation outline, a classroom case study, and a quiz/assessment

Faculty Assignment

Develop one AI-enhanced teaching module for your subject, using the lesson-plan and presentation tools from this session.

Responsible AI in academia, from Weekend 1

Keep confidential student data and unpublished research out of public AI tools, verify AI-generated academic content against trusted sources, and always review AI-drafted material before using it in class.

WEEKEND 2 • AI for Pharmaceutical Research & Innovation

2 hours • Live Video Conference • Build a real research framework

Time	Min	Module	Tools & platforms	Hands-on outcome
0:00-0:45	45	AI-Powered Research	Perplexity (literature search) • Gemini NotebookLM (analysis, comparison, citations) • ChatGPT / Claude (research questions, patent intelligence)	Scientific literature search, research-paper analysis, literature review, research-gap identification, research-question development, patent & scientific intelligence, and reference/citation assistance
0:45-1:15	30	AI in Pharma & Life Science Research	Claude • ChatGPT • Perplexity • Gemini NotebookLM	Applied AI discussion across Drug Discovery, Clinical Research, Pharmacovigilance, Biotechnology, Healthcare Analytics, and Pharmaceutical Market Intelligence
1:15-2:00	45	Hands-on Research Workshop	Perplexity • Gemini NotebookLM • ChatGPT / Claude	Work a real research topic through: Research Topic → Literature → AI Analysis → Research Gap → Hypothesis → Research Framework

Faculty Assignment

Create an AI-assisted research proposal or concept note, and refine your prompt using Prompt Genie. Verify every clinical or scientific claim against a trusted reference before including it.

WEEKEND 3 • AI for Faculty Productivity, Data & Future Education

2 hours • Live Video Conference • Ends with your capstone presentation

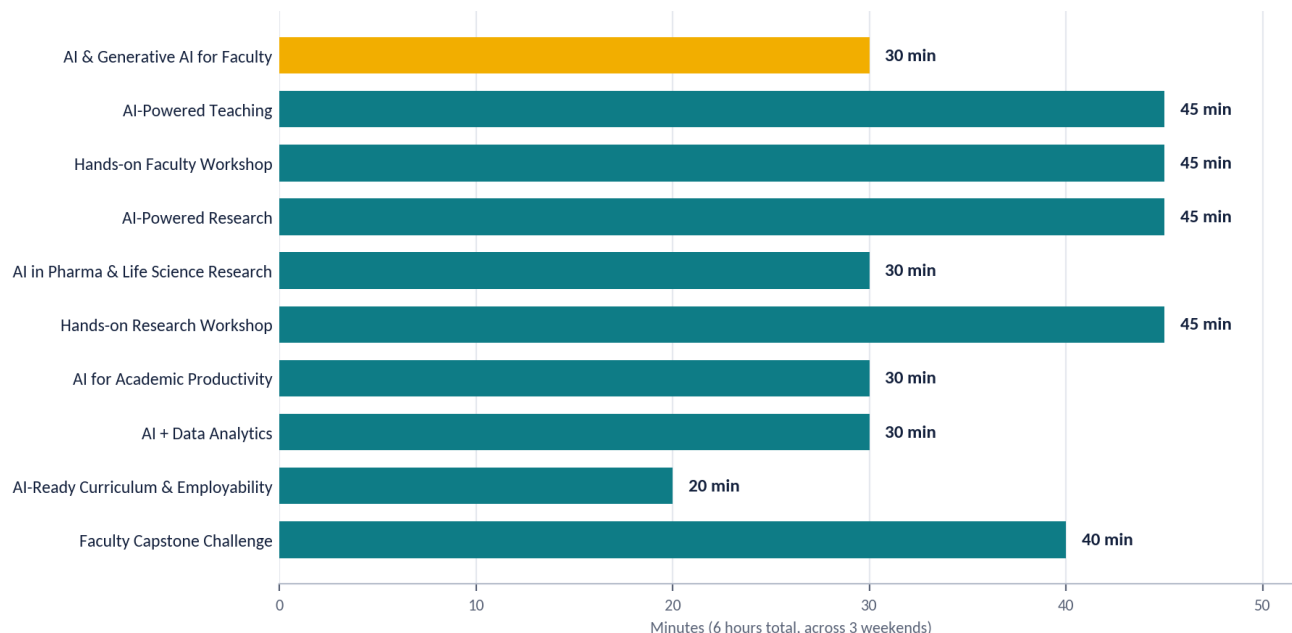

Time	Min	Module	Tools & platforms	Hands-on outcome
0:00–0:30	30	AI for Academic Productivity	ChatGPT / Claude (writing, reports, emails) • TLDV (meeting summaries) • Gamma (conference/seminar decks)	Research reports, academic writing, emails and professional communication, meeting summaries, SOPs and documentation, grant/proposal support, and conference/seminar preparation
0:30–1:00	30	AI + Data Analytics	Excel + AI (ChatGPT/Claude/Gemini) • HTML dashboards via Claude / Perplexity / Kimi	Research-data analysis, survey analysis, charts and dashboards, student-performance analysis, and turning data into actionable insights
1:00–1:20	20	AI-Ready Curriculum & Employability	Gemini NotebookLM • Gemini Create • ChatGPT / Claude	Integrating AI into the Pharma/Life Science curriculum, developing industry-relevant AI skills, AI-based assignments and projects, and preparing students for AI-enabled careers
1:20–2:00	40	Faculty Capstone Challenge	Claude (Skills & Connectors) • Gemini NotebookLM • Gemini Create • Gamma	Develop an AI-powered academic solution — an AI Teaching Assistant, Research Assistant, Subject-specific AI Tutor, AI Question-Bank Generator, Student Mentoring Assistant, or AI-powered Academic Content Generator — and present it live

Faculty Capstone Challenge

Choose one academic solution to build — an AI Teaching Assistant, Research Assistant, Subject-specific Tutor, Question-Bank Generator, Student Mentoring Assistant, or Content Generator — and present it to the group in the final minutes of the program. This is the centrepiece of your certificate.

Time Allocation by Module, Weekend by Weekend

How the 6 hours are distributed across the ten learning modules. Minutes per module are shown; every weekend session is 120 minutes.

Module	Weekend 1	Weekend 2	Weekend 3	Total
AI & Generative AI for Faculty	30	–	–	30 min
AI-Powered Teaching	45	–	–	45 min
Hands-on Faculty Workshop	45	–	–	45 min
AI-Powered Research	–	45	–	45 min
AI in Pharma & Life Science Research	–	30	–	30 min
Hands-on Research Workshop	–	45	–	45 min
AI for Academic Productivity	–	–	30	30 min
AI + Data Analytics	–	–	30	30 min
AI-Ready Curriculum & Employability	–	–	20	20 min
Faculty Capstone Challenge	–	–	40	40 min
Total (minutes)	120	120	120	6 h

Weekend 1 = Teaching & Academic Excellence · Weekend 2 = Research & Innovation · Weekend 3 = Productivity, Data & Future Education. Each weekend is one 120-minute live session.

Subject-Area AI Use Cases

Typical AI use cases for common Pharmacy and Life Science subject areas, the tools taught in the program that serve them, and the weekend where each is introduced. Use it to plan your own capstone around your subject.

Subject area	High-impact AI use cases	Tools you will use	Weekend
Pharmaceutics	Formulation case studies, SOP-style protocols, lecture presentations	ChatGPT / Claude · Gamma	W1
Pharmacology	Mechanism-of-action explainers, quiz generation on drug actions	ChatGPT / Claude · NotebookLM	W1
Pharmaceutical Chemistry	Literature on synthesis routes, structure–activity discussion	Perplexity · NotebookLM	W2
Pharmacognosy	Converting monographs into student-friendly notes, classroom case studies	ChatGPT / Claude · NotebookLM	W1
Clinical Pharmacy	Case-study generation, clinical literature review	Perplexity · NotebookLM · Claude	W1 · W2
Pharmacy Practice	Patient-counselling role-play scripts, communication practice	ChatGPT · live debate board	W1
Biotechnology	Research-trend summaries, grant-proposal drafting	Perplexity · NotebookLM · ChatGPT	W2 · W3
Pharmaceutical Analysis	Data interpretation, dashboards for lab/QC data	HTML dashboards · Excel + AI	W3
Hospital & Community Pharmacy	SOP documentation, meeting and rotation summaries	Claude · TLDV	W3
Research Methodology	Research-proposal writing, hypothesis framing	Perplexity · NotebookLM · ChatGPT / Claude	W2

Your capstone, your subject

In Weekend 3's Faculty Capstone Challenge, build your AI teaching or research assistant around the subject area you teach.

Tool Directory (used in this program)

Keep this page as your one-stop reference after the workshop.

Core AI assistants — Weekends 1, 2 & 3

Tool	Used for in this program	Link
ChatGPT	Lecture plans, writing, research questions, communication	chat.openai.com
Claude	Case studies, HTML dashboards, capstone AI assistant (Skills)	claude.ai
Gemini	General prompting, fundamentals, Gemini Create	gemini.google.com
Perplexity	Literature search, research and industry intelligence	perplexity.ai
Gemini NotebookLM	Source-grounded summarisation, student-friendly explainers, citations	notebooklm.google.com

Prompting, content & presentations — Weekends 1 & 3

Tool	Used for in this program	Link
Prompt Genie	Optimising a rough prompt into a sharper one	prompt-genie.com
Gamma	Turning notes into a polished lecture deck or conference presentation	gamma.app
Genspark	All-in-one content creation for academic material	genspark.ai

Productivity, data & meetings — Weekend 3

Tool / practice	Used for in this program	Link
TLDV	AI notetaker for meeting and rotation summaries (Meet, Zoom, Teams)	Meeting add-on
HTML dashboards (Claude/Perplexity/Kimi)	Research-data and student-performance dashboards from pasted data	Prompted directly inside each chat tool
Excel + AI	Survey and research-data analysis, trend charts	Any core assistant above, applied to your data

Alternative chat assistants (introduced, optional)

Session 1 introduces you to a wider set of assistants so you can compare styles — Grok, Kimi and GLM 5 (chat.z.ai) — though the program's hands-on work centres on the five core tools above.

Investment & Certification

PROGRAM FEE

₹ 3,542

inclusive of 18% GST, per faculty

Program fee	₹ 3,002
GST @ 18%	₹ 540
Total payable	₹ 3,542

What is included

- 6 hours: three 2-hour live weekend sessions
- Hands-on with 10+ core AI tools, plus an extended resource library
- Practical Pharma / Life Science use cases for teaching and research
- Faculty assignments and a capstone challenge
- Digital learning resources
- Certificate of Participation / Completion

GST shown rounded to the nearest rupee (18% of ₹3,002 = ₹540.36).

Learning platform & support

- **Live, two-way video conference** — ask questions and get answers in real time
- **Faculty assignments** that build directly toward your capstone challenge
- **Facilitator support** across all three weekends for doubt-clearing

Your certificate

On successful completion of all three weekends and the capstone presentation, you receive a Certificate of Participation/Completion — recognising your hands-on AI capability as a pharmaceutical or life science educator.

Ready to bring AI into your classroom and your research? Reach out to the Academy team to reserve your seat.

Extended Toolkit & Resource Library

Beyond the core modules, you receive a curated library of platforms for multi-model access, research, course creation and dashboards — useful for your own teaching material and research, and for exploring after the program ends. Free-tier availability and features change often, so check each platform before you rely on it.

Platform	What it is used for	Link
Kimi / GLM 5 (Z.ai)	Alternative chat assistants for prompting and content	chat.z.ai
Poe / arena.ai / GetMulti / DesignArena / Bytez	Free multi-model chat access for comparing AI outputs	poe.com · arena.ai · getmulti.ai · designarena.ai · bytez.com
DeepSeek	Alternative chat assistant	chat.deepseek.com
Apodex	Deep-research assistant for literature-heavy questions	apodex.ai
AnswerThis	AI research assistant	app.answerthis.io
Flourish / DataSquirrel / Memex / TheBricks / SnapLearn	No-code dashboard platforms for research and student data	Explore individually as needed
Oboe	Create your own course on any topic	oboe.com
Alison	Free self-paced courses, including AI fundamentals	alison.com
Denovo	Idea-to-go-to-market planning (useful for innovation/incubation electives)	denovo.dev
Google Stitch	Text-to-UI design (HTML/CSS, Figma export)	stitch.withgoogle.com
Google Opal	No-code AI mini-app & workflow builder	opal.withgoogle.com
