

PharmaAI

AI Mastery for Pharmaceutical & Life Science Students

3-Weekend Hands-on Certification Workshop

Learn AI. Apply AI. Research with AI. Build Your Future. Master practical AI skills for pharma and life sciences in just 6 hours across three weekends — hands-on from the very first session.

DSet Academy × School of Life Science

Skill Development Training & Research • Domain Partner: Imperical Consulting (Pvt.) Ltd.

6 hrs

total training

3

weekends • 2 h each

What you will master

Research intelligence

Perplexity • Gemini NotebookLM • ChatGPT • Claude

Drug discovery & pharma applications

AI-assisted case study across the pharma value chain

Generative AI for coursework

Gamma • Genspark • NotebookLM for writing & presentations

Data analytics with AI

Excel + AI • HTML dashboards via Claude / Perplexity / Kimi

AI-ready career building

LinkedIn content & website • AI-enhanced CV

Capstone challenge

Build and present a real pharma AI solution

Format

2 hours every weekend → 3 weekends → 6 hours total, live via video conference, with two-way voice and video.

Designed for

Pharmacy, Pharmaceutical Sciences & Life Science students preparing for an AI-ready career.

About the Program

PharmaAI is a hand-held, hands-on program that helps pharmaceutical and life science students build real AI skills — not by listening to a lecture, but by doing: searching, summarising, analysing, and building with AI tools on real coursework and pharma scenarios, session by session.

Delivered live over video conference across three weekends, the program takes you from AI fundamentals to a final capstone challenge, where you build and present your own AI-powered solution to a real pharma or healthcare problem.

Why this program

Built for pharma & life sciences

Every topic, tool and case study is chosen for a pharmaceutical or life science student, not a generic audience.

Workshop, not lecture

Hands-on from the first weekend — you leave every session with an output, not just notes.

Research to career, in one program

From literature review to an AI-ready CV and LinkedIn profile, in just three weekends.

True two-way communication

Voice and video interaction both ways on our platform — not a one-way broadcast with a chat box.

Real capstone challenge

Finish by building and presenting an AI solution to a real-world pharma problem.

Detailed certificate

A certificate that lists every tool you have used across the program.

Program Outcome

Understand AI	Prompt AI	Research with AI	Analyse with AI	Solve Pharma Problems with AI	Build an AI-Ready Career Profile
---------------	-----------	------------------	-----------------	-------------------------------	----------------------------------

By the end of three weekends, students progress through each stage above — from understanding AI to building an AI-ready career profile.

Program at a Glance

Weekend	Theme	Duration
Weekend 1	AI Foundations + Research Intelligence	2 Hours
Weekend 2	Drug Discovery + Clinical + Pharma Applications	2 Hours
Weekend 3	AI + Data + Career + Capstone	2 Hours
Total	6-Hour Program	3 Weekends

Your 3-Weekend Roadmap

Weekend	Theme	Format
Weekend 1	AI Foundations & Research Intelligence	2 Hours · Live Video Conference
Weekend 2	AI in Drug Discovery, Clinical Research & Pharma	2 Hours · Live Video Conference
Weekend 3	AI Skills, Data Analytics & Career Transformation	2 Hours · Live Video Conference

Each weekend is a single 2-hour live session. Timings, sequence and batch dates are indicative and are confirmed for each batch. A short assignment follows Weekends 1 and 2.

Curriculum Map

Ten learning clusters take you from AI fundamentals to a capstone challenge you present live.

Cluster	Tools & topics	When
1 • Safety & responsible AI	AI Security and data-privacy basics for handling research and pharma data safely	Weekend 1
2 • AI & prompt fundamentals	ChatGPT · Claude · Gemini · Perplexity · introduction to prompt engineering	Weekend 1
3 • Research intelligence	Literature search, summarisation, comparison, gap identification & research questions — Perplexity, NotebookLM	Weekend 1
4 • Drug discovery & development concepts	AI-assisted understanding of target identification through clinical trials	Weekend 2
5 • AI across the pharma value chain	Applied AI across Clinical Research, Pharmacovigilance, Regulatory, Medical Affairs, QA/QC, Manufacturing, Market Research & Supply Chain	Weekend 2
6 • Applied problem solving	Hands-on case study: Problem → AI Prompt → Analysis → Output → Verification	Weekend 2
7 • Generative AI for academic work	Assignments, presentations, dissertation/thesis support, SOPs & scientific writing — ChatGPT, Claude, Gamma, NotebookLM	Weekend 3
8 • Data analytics with AI	Excel + AI · HTML dashboards via Claude, Perplexity, Kimi · market/sales analysis	Weekend 3
9 • AI-ready career building	AI-enhanced CV, LinkedIn content & website, interview preparation, personal AI portfolio	Weekend 3
10 • Capstone challenge	Select a real-world pharma problem, build an AI solution, and present it live	Weekend 3

Session-by-Session Learning Plan

Every block below lists the exact time allotted, the tools you will use, and the output you walk away with.

WEEKEND 1 • AI Foundations & Research Intelligence

2 hours • Live Video Conference • Hands-on from minute one

Time	Min	Module	Tools & platforms	Hands-on outcome
0:00–0:30	30	AI & Generative AI for Life Sciences	ChatGPT • Claude • Gemini • Perplexity	What AI, Generative AI, Machine Learning & AI Agents are, how AI is transforming Pharma & Life Sciences, and an introduction to prompt engineering
0:30–1:15	45	AI for Pharmaceutical Research	Perplexity • Gemini NotebookLM • ChatGPT / Claude	Scientific literature search, research-paper summarisation and comparison, identifying research gaps, research-question generation, and patent & scientific intelligence
1:15–2:00	45	Hands-on Workshop	Perplexity • Gemini NotebookLM	Work on a real research topic — Search → Analyze → Summarize → Identify gaps → Develop research questions

Weekend Assignment

Prepare a mini AI-assisted literature review on a selected Pharma / Life Science topic, using Perplexity and NotebookLM.

Responsible & safe AI, from Weekend 1

Life Science data is sensitive. Keep confidential or unpublished research data out of public AI tools, verify AI-generated claims against trusted sources, and always keep a human — you — reviewing the final output.

WEEKEND 2 • AI in Drug Discovery, Clinical Research & Pharma

2 hours • Live Video Conference • Solve a real pharma problem

Time	Min	Module	Tools & platforms	Hands-on outcome
0:00–0:40	40	AI in Drug Discovery & Development	ChatGPT • Claude • Gemini • Perplexity	Explore target identification, molecule discovery, drug screening, drug repurposing, ADME/Toxicity concepts, preclinical development and clinical trials — using AI as a study and discussion partner
0:40–1:15	35	AI Across the Pharmaceutical Industry	Claude • Perplexity • Gemini NotebookLM	Applied AI examples across Clinical Research, Pharmacovigilance, Regulatory Affairs, Medical Affairs, QA/QC, Manufacturing, Market Research and Supply Chain
1:15–2:00	45	Hands-on Case Study	ChatGPT / Claude • Perplexity • NotebookLM (verification)	Solve a pharmaceutical problem using AI — Problem → AI Prompt → Analysis → Output → Verification

Weekend Assignment

Develop one AI use case for your preferred pharmaceutical career or function, and refine your prompt using Prompt Genie. Remember: treat every AI-generated clinical or scientific claim as a starting point, and cross-check it against a trusted reference before using it.

WEEKEND 3 • AI Skills, Data Analytics & Career Transformation

2 hours • Live Video Conference • Ends with your capstone presentation

Time	Min	Module	Tools & platforms	Hands-on outcome
0:00–0:30	30	Generative AI for Students	ChatGPT • Claude • Gamma • Gemini NotebookLM	Assignments & projects, presentations, dissertation/thesis support, scientific writing, SOPs & reports, data interpretation and professional communication
0:30–1:00	30	AI + Data Analytics	Excel + AI (ChatGPT/Claude/Gemini) • HTML dashboards via Claude / Perplexity / Kimi	Pharmaceutical data analysis, identifying trends, creating charts and dashboards, market/sales analysis, and turning data into insights
1:00–1:20	20	Career with AI	ChatGPT / Claude (CV & interview prep) • LinkedIn content & LinkedIn-to-website tools	Become an AI-ready pharma professional: AI skills employers look for, an AI-enhanced CV, a stronger LinkedIn profile, interview preparation, and a personal AI portfolio
1:20–2:00	40	Final Capstone Challenge	Perplexity • Gemini NotebookLM • ChatGPT / Claude • Gamma	Select a real-world problem from Drug Discovery, Clinical Research, Pharmacovigilance, Manufacturing, Market Research, Healthcare or Pharmacy, develop an AI solution, and present it live

Capstone Challenge

Work solo or in a team. Pick one real-world problem, build your AI-assisted solution, and present it to the group in the final minutes of the program — this is the centrepiece of your certificate.

Time Allocation by Module, Weekend by Weekend

How the 6 hours are distributed across the ten learning modules. Minutes per module are shown; every weekend session is 120 minutes.

Module	Weekend 1	Weekend 2	Weekend 3	Total
AI & Generative AI Fundamentals	30	–	–	30 min
AI for Pharmaceutical Research	45	–	–	45 min
Research Hands-on Workshop	45	–	–	45 min
AI in Drug Discovery & Development	–	40	–	40 min
AI Across the Pharma Industry	–	35	–	35 min
Hands-on Pharma Case Study	–	45	–	45 min
Generative AI for Students	–	–	30	30 min
AI + Data Analytics	–	–	30	30 min
Career with AI	–	–	20	20 min
Final Capstone Challenge	–	–	40	40 min
Total (minutes)	120	120	120	6 h

Weekend 1 = Research Intelligence · Weekend 2 = Drug Discovery & Pharma Applications · Weekend 3 = Data, Career & Capstone. Each weekend is one 120-minute live session.

Career-Function-Wise AI Use Cases

Typical AI use cases for each pharma and healthcare function, the tools taught in the program that serve them, and the weekend where each is introduced. Use it to see where your own career interest fits.

Function	High-impact use cases	Tools you will use	Weekend
Drug Discovery	Target identification concepts, molecule-screening literature, hypothesis generation from published research	Perplexity · NotebookLM · ChatGPT / Claude	W1 · W2
Clinical Research	Protocol & trial-literature summarisation, patient-education drafting	Perplexity · NotebookLM · ChatGPT	W1 · W2
Pharmacovigilance	Adverse-event literature scanning, safety-signal summary drafting	Perplexity · NotebookLM · Claude	W2
Regulatory Affairs	Guideline summarisation, submission-checklist drafting	NotebookLM · Claude · Perplexity	W2
Medical Affairs	Scientific-content summaries, HCP education material	Perplexity · NotebookLM · ChatGPT	W1 · W2
QA / QC	SOP drafting, compliance-checklist summarisation	Claude · ChatGPT	W2 · W3
Manufacturing	Batch/process SOP Q&A, deviation-trend interpretation from data	NotebookLM · HTML dashboards	W2 · W3
Market Research	Sales/market dashboards, trend & competitor summaries	HTML dashboards · Perplexity · Gamma	W3
Supply Chain	Demand & inventory dashboards, monitoring and alerts	HTML dashboards (Claude/Perplexity/Kimi)	W3
Pharmacy & Healthcare Practice	Patient communication drafting, medication-information summarisation, language transformation	ChatGPT / Perplexity · NotebookLM	W1 · W2

Your capstone, your function

In Weekend 3's Final Capstone Challenge, pick the function above that matches your interest and build a working AI solution for it.

Tool Directory (used in this program)

Keep this page as your one-stop reference after the workshop.

Core AI assistants — Weekends 1, 2 & 3

Tool	Used for in this program	Link
ChatGPT	General prompting, research questions, career & content writing	chat.openai.com
Claude	Case-study analysis, HTML dashboards, dissertation support	claude.ai
Gemini	General prompting, fundamentals, career content	gemini.google.com
Perplexity	Literature search, clinical/industry research, dashboards	perplexity.ai
Gemini NotebookLM	Source-grounded summarisation, comparing papers, verification	notebooklm.google.com

Prompting & content — Weekends 1 & 3

Tool	Used for in this program	Link
Prompt Genie	Optimising a rough prompt into a sharper one	prompt-genie.com
Gamma	Turning notes into a polished presentation or SOP	gamma.app
Genspark	All-in-one content creation for capstone decks	genspark.ai

Data, dashboards & career — Weekend 3

Tool / practice	Used for in this program	Link
HTML dashboards (Claude/Perplexity/Kimi)	Sales, market and inventory dashboards from pasted data	Prompted directly inside each chat tool
Excel + AI	Pharmaceutical data analysis and trend charts	Any core assistant above, applied to your data
LinkedIn content & website tools	Building a LinkedIn profile and personal AI portfolio	ChatGPT / Claude / Gemini / Perplexity

Alternative chat assistants (introduced, optional)

Session 1 introduces you to a wider set of assistants so you can compare styles — Grok, Kimi and GLM 5 (chat.z.ai) — though the program's hands-on work centres on the five core tools above.

Investment & Certification

PROGRAM FEE

₹ 2,369

inclusive of 18% GST

Program fee	₹ 2,008
-------------	---------

GST @ 18%	₹ 361
-----------	-------

Total payable	₹ 2,369
----------------------	----------------

What is included

- 6 hours: three 2-hour live weekend sessions
- Hands-on with 10+ core AI tools, plus an extended resource library
- A capstone challenge you build and present live
- Weekend assignments with facilitator feedback
- Two-way voice and video on a live video-conference platform
- Detailed certificate listing every tool completed

GST shown rounded to the nearest rupee (18% of ₹2,008 = ₹361.44).

Learning platform & support

- **Live, two-way video conference** — ask questions and get answers in real time
- **Weekend assignments** that build directly toward your capstone challenge
- **Facilitator support** across all three weekends for doubt-clearing

Your certificate

On successful completion of all three weekends and the capstone presentation, you receive a detailed certificate listing every tool you have used — evidence of hands-on AI capability for your pharma or life science career.

Ready to become an AI-ready pharma professional? Reach out to the Academy team to reserve your seat.

Extended Toolkit & Resource Library

Beyond the core modules, you receive a curated library of platforms for multi-model access, research, course creation and dashboards — useful for your assignments and capstone, and for exploring after the program ends. Free-tier availability and features change often, so check each platform before you rely on it.

Platform	What it is used for	Link
Kimi / GLM 5 (Z.ai)	Alternative chat assistants for prompting and content	chat.z.ai
Poe / arena.ai / GetMulti / DesignArena / Bytez	Free multi-model chat access for comparing AI outputs	poe.com · arena.ai · getmulti.ai · designarena.ai · bytez.com
DeepSeek	Alternative chat assistant	chat.deepseek.com
Apodex	Deep-research assistant for literature-heavy questions	apodex.ai
AnswerThis	AI research assistant	app.answerthis.io
Flourish / DataSquirrel / Memex / TheBricks / SnapLearn	No-code dashboard platforms for data storytelling	Explore individually as needed
Oboe	Create your own course on any topic	oboe.com
Alison	Free self-paced courses, including AI fundamentals	alison.com
Denovo	Idea-to-go-to-market planning	denovo.dev
Google Stitch	Text-to-UI design (HTML/CSS, Figma export)	stitch.withgoogle.com
Google Opal	No-code AI mini-app & workflow builder	opal.withgoogle.com
